

Educational Equipment Industries Company

Designing, producing and supplying educational, laboratory and workshop equipment and tools for all educational stages

Administrative and workshop building

Regarding the significant role of education in Iran and optimization of huge educational investment, the Ministry of Education and Industrial Development and Renovation Organization of Iran determined to establish Educational Equipment Industries Company (EEI) in 1974.

Having passed a long time of providing educational services and gaining experiences, EEI has reinforced its capabilities and products quality through membership of some international and national institutions such as ASE (the association for science education, England), Worlddidac (the international educational equipment organization), Iran's R&D association, and holding ISO 9001:2000 certified by TUV NORD, Germany.

Now, EEI has been capable enough to turn into the largest manufacturer of educational equipment in the Middle East by taking advantage of its R&D department and 540 educated staff and experts as well as its equipped and modern factory. Hence, the company is able to produce all kinds of educational equipment (in few numbers to mass production) in accordance with the international standards and deliver them to all educational centers.

Enjoying 40000 m² out of 50000 m² areas for manufacturing with 3000 m² administrative area and 7000 m² for warehouse in 14 workshop halls, all products are manufactured.
