

○ Electro pneumatics and electro hydraulics set

Introduction

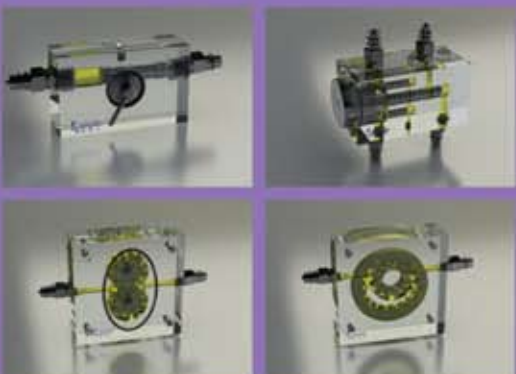

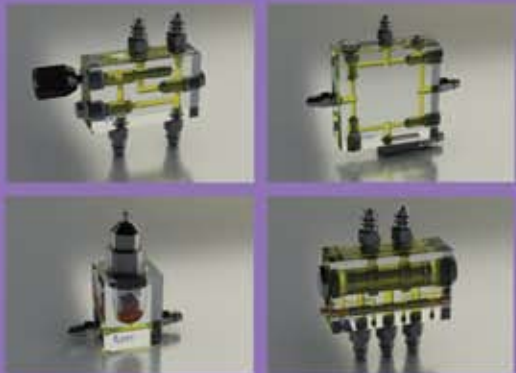

Nowadays, usage of hydraulics and pneumatics science has developed considerably in industries such as air industries, agricultural and road construction. Furthermore, these systems are growing in the mechatronics equipment and automatic systems day by day.

E.E.I. has tried to ease the teaching of basic concepts of advanced systems by designing and producing 5 following sets.

Transparent hydraulic set

○ Electro pneumatics and electro hydraulics set

Transparent hydraulics elements set
