

Introduction

The role of physics as an important science in the modern life is obvious to everyone. Hence, EEI has designed and produced a physics kit for high school which consists of different subdivisions:

Magnetism and electricity kit, Electrostatics kit, General mechanics kit, Optics kit, Heat kit and Panel electricity.

Electrostatics kit

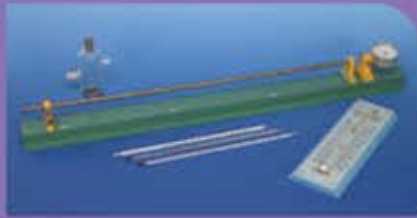

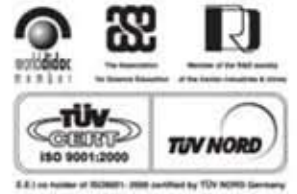

Electro -magnetism and electricity kit

Panel electricity

○ Physics kit for high school

Heat kit

Electromagnetism and electricity kit

General mechanics kit

Mechanics kit

Optics kit

Introduction

Enjoying experiments, researchers attain profound concepts and new theories with learnt theories and practical skills. That is why; scientists spend most of their time in laboratories.

The university physics set concludes 3 subsets: mechanics, heat and electricity and magnetism. Some items of these sets are shown below:

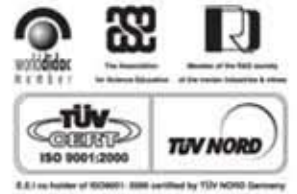

Projectile launcher

Free fall timer

○ University physics set

mode timer with 0.001s accuracy
