

Introduction

To flourish the creativity competence of students, this kit is designed based on a student - orientated method.

The science kit tries to fulfill education objectives in three areas:

1. Learning the essential knowledge
2. Learning Skills
3. Acquiring the essential views

To meet the 3 said objectives, this kit has been designed and produced. The kit is produced and presented with 12 subsets to educational centers.

Some subsets are shown here:

Biology kit

Anatomy models

Small weather station

Air cock

Optics kit

Meteorology kit

Science kit for elementary school

Sound kit

Magnetism kit

Air kit

Heat kit

Water kit

Mechanics kit

Materials and their changes kit

Energy kit

Introduction

Man uses his senses for decoding the universe secrets. Consequently, the role of experiences is very important in this area.

Using the different kinds of tools reinforces human being to know the world secrets and transforms his life.

Concluding 151 items, the science kit for middle school helps you to do minimum 14 experiments in the followin 5 sets: Chemistry, Biology, Geology and Geography, Physics and their laboratory tools.

You can see below some images of these sets.

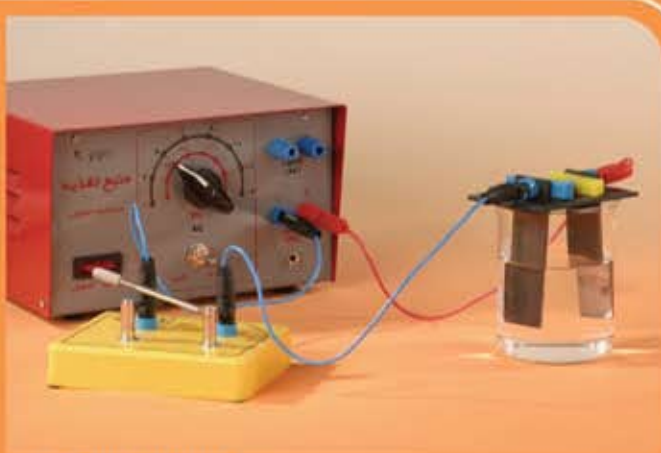

Steam engine

Electrical microscope 400X

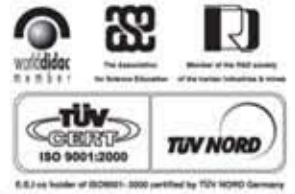

Minerals and stones kit

Power Supply
